

A Quick Overview

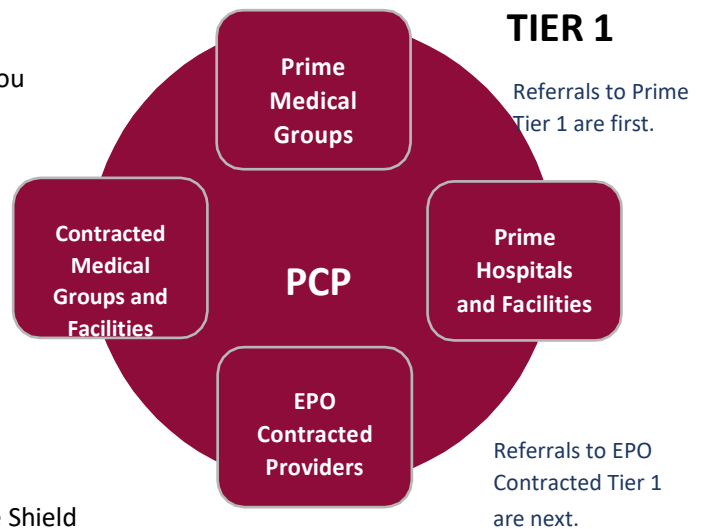

How to Use the Prime Employee Health Plan

How the Prime EPO Plan Works

Your **Primary Care Provider (PCP)** takes care of you and refers you for medical services as needed. When you go to your PCP and other Tier 1 Providers, you receive almost all care at no cost with no need for advance approval.

Tier 1 is made up of two kinds of providers: 1. Prime medical groups, hospitals, and facilities, and 2. Contracted providers medical groups, and facilities. **Services received from Prime providers bring you the greatest benefits at the lowest cost.**

If the services you need are not available in Tier 1, your PCP or provider will refer you to Tier 2.

Tier 2 is made up of Blue Cross Blue Shield plan providers contracted by Prime to serve our EPO members. **Services in Tier 2 always**

require referral and approved prior authorization. Your services must be approved *before you receive them* to be covered under your plan.

1.5 Benefits allow you to receive Tier 2 services at Tier 1 rates when some services are not available in Tier 1 or Tier 2. **Approval and prior authorization are always required before you can be covered for 1.5 Benefits.**

When Prior Authorization is required, always be sure to get approval before getting medical services.

The Prime EPO is a nationwide plan. Based on differing availability of providers in the communities we serve, your benefit tiers may vary slightly from what is shown above.

Tips to Make it Easy to Use Your EPO Plan Benefits

1. Be sure your providers know that you are in an EPO plan and may require authorizations before you receive care. Also ask them about treatment options that are covered under your plan.
2. Follow plan requirements carefully, and you will receive your full benefits and not incur extra costs.
3. If you are unsure about what to do, please ask *before you receive care*. You can get help from Customer Service. Contact information is on the other side of this page and can be found on the back of your member ID card.

See other side for additional information.

How to Understand Your Prior Authorization Requirements

The details about how and when to receive authorizations are covered in two charts. They include definitions for some common health benefit terms. The columns list services and the type of providers you would visit to receive them. Color coding shows which services need or don't need authorizations. Finally, footnotes provide additional information about specific requirements.

The charts are expanded and explained as part of a brief video presentation available online at www.primehealthcare.com/EHP or on your smartphone by scanning the QR code at the bottom of this page.

Service	Type of Provider	Authorization Status
